

Double-Break Beavertail

Add the Double-Break Beavertail option to your deck over model and you'll have one of the easiest loading/unloading trailers in the business. Option comes standard with 6' ramps and the 7'-6" beavertail goes from 12 degrees down to 6 degrees! The Double-Break Beavertail minimizes "high pointing" with a smooth transition from beavertail to flat deck. Ideal for excavators, trenching machines and other tracked machinery. Angle iron beavertail offers superior traction.

Angle-iron beavertail with 12° to 6° transition to deck.

6-foot angle-iron ramps.

Standard two-way spring assist ramps.

Quick Specs:

- 12° to 6° transition to deck
- 7'-6" length
- 6-ft. ramps
- Two-way spring-assist ramps
- Angle-iron cross slats

Available on:

- T-20
- T-24
- T-30
- T-40
- T-50
- T-50RG
- T-70RG

- Wood-covered

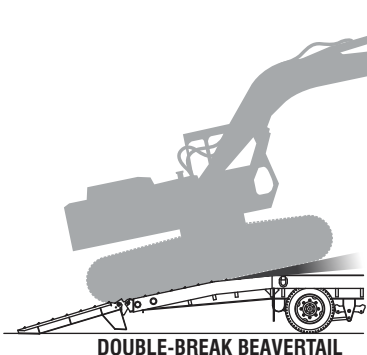

STANDARD BEAVERTAIL

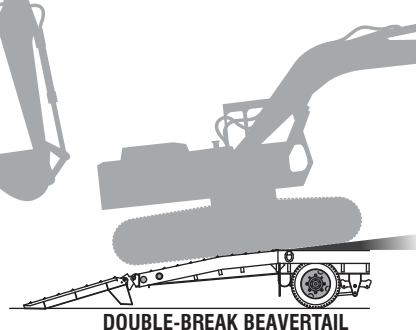

STANDARD BEAVERTAIL

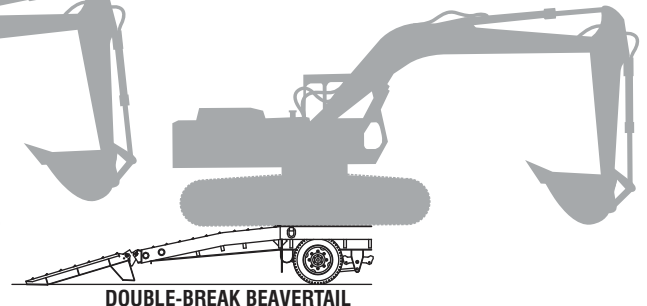

On a standard beavertail, tracked equipment tends to “high-point” before the front of it “slams” onto the trailer deck, making loading and unloading a bit nerveing.

DOUBLE-BREAK BEAVERTAIL

DOUBLE-BREAK BEAVERTAIL

DOUBLE-BREAK BEAVERTAIL

With our double-break beavertail, tracked equipment eases onto the deck better, making loading and unloading easier on the operator and equipment.

*Payload capacity is calculated by taking the GVWR and subtracting the trailer weight. Listed GVWR, weights, and dimensions are for reference only.
